

Tension levers safety internal thread

Item description/product images

press to
engage
(safety function)

Description

Material:

Steel parts grade 5.8.

Ball knob black plastic.

Version:

Powder-coated with fine texture, black.

Type of operation:

Press the handle down until the teeth are fully engaged. The object can now be clamped or released. Spring pressure pushes the handle up disengaging the teeth and thereby restoring the safety function (handle can be rotated without engaging).

On request:

Special versions.

Dimensions "H1" and "A" available in other lengths at extra charge.
