

Guide rollers, plastic, cylindrical without pins

Item description/product images

Description

Material:

Roller rim polyurethane (PUR).
Bearing steel.

Version:

Roller rim dark brown.

Note:

The roller rim is firmly bonded onto a ball bearing. From diameter $D = 40$ mm, the roller rim has a double-layer

The advantage of a PUR roller rim is quiet running.

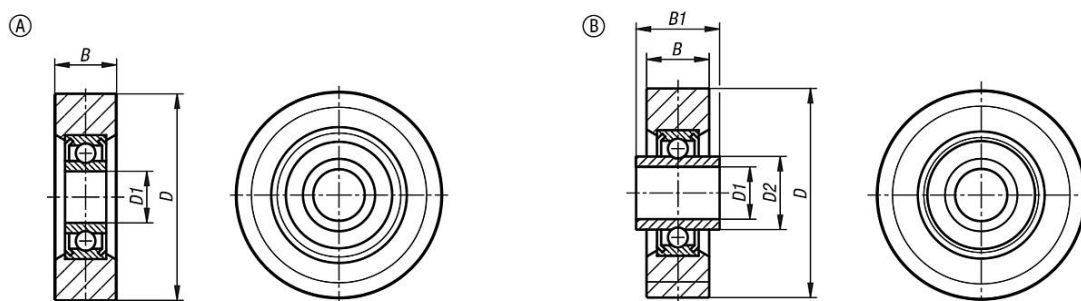

These guide rollers are not suitable for high temperatures, high humidity or exposure to water. The guide rollers are resistant to solvent-free oils. Oils with solvent content can cause swelling or strength deterioration.

The radial load was tested over one million revolutions at 300 rpm. These results may vary depending on operating conditions and environment.

Accessory:

Matching pins K2378.
